THE

AMERICAN JOURNAL

OF

SCIENCE AND ARTS.

EDITORS AND PROPRIETORS,

JAMES D. DANA, B. SILLIMAN, AND E. S. DANA.

ASSOCIATE EDITORS,

PROFESSORS ASA GRAY AND WOLCOTT GIBBS,
OF CAMBRIDGE,

PROFESSORS H. A. NEWTON, S. W. JOHNSON,
GEO. J. BRUSH AND A. E. VERRILL,
OF NEW HAVEN,

PROFESSOR EDWARD C. PICKERING, OF BOSTON.

vol. 110
Jul.-Dec.
1875

Jurley

THIRD SERIES.

VOL. X—[WHOLE NUMBER, CX.]

Nos. 55—60*.

JULY TO DECEMBER, 1875.

WITH A TEN-VOLUME INDEX AND TEN PLATES.

NEW HAVEN: EDITORS.
1875.

CONTENTS OF VOLUME X.

NUMBER LV.

Page

ART. I.—Results derived from an examination of the United States Weather Maps for 1872, '73 and '74, with Plate I; by ELIAS LOOMIS, ... 1

II.—Preliminary Note on a Magnetic Proof Plane; by HENRY A. ROWLAND, ... 14

III.—On Pseudomorphs of Chlorite after Garnet at the Spurr Mountain Iron Mine, Lake Superior, with Plate II; by RAPHAEL PUMPELLY, ... 17

IV.—Application of the Horizontal Pendulum; by H. AMORY, 21

V.—Explosive properties of Methyl Nitrate; by M. CAREY LEA, 22

VI.—On Zonochlorite and Chlorastrolite; by GEO. W. HAWES, 24

VII.—On Glycogen and Glycocoll in the muscular tissue of Pecten irradians; by R. H. CHITTENDEN, ... 26

VIII.—Dr. Koch and the Missouri Mastodon; by E. ANDREWS, 32

IX.—Rate of Growth of Corals; by JOSEPH LECONTE, ... 34

X.—Results of Dredging Expeditions off the New England Coast in 1874, with Plates III and IV; by A. E. VERRILL, 36

XI.—Examination of Gases from the Meteorite of Feb. 12, 1875; by ARTHUR W. WRIGHT. 44

XII.—Discovery of two new Asteroids; by C. H. F. PETERS, 49

XIII.—Discovery of a method of obtaining Thermographs of the Isothermal Lines of the Solar Disc; by A. M. MAYER, 50

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—On the action of a weaker acid on the Salts of a stronger one, HÜBNER and WIESINGER, 51.—On Iodous Chloride, BRENKEN: On the Paraffins of Pennsylvania Petroleum, MORGAN, 52.—Action of Ammonium chloride on Methyl alcohol, WEITH: On Glyceryl ether, VON ZOTTA, 53.—On the Purification of Salicylic Acid, RAUTERT: On a New Method of Testing Quinidine Sulphate, HESSE, 54.—Mechanical Equivalent of Heat, M. H. J. PULUJ. 55.—Action of Magnets on Geissler Tubes, M. J. CHAUTARD: Effect of Electricity of high tension on Liquids, M. G. PLANTE, 56.

Geology and Natural History.—Greenland Glaciers: Subglacier rivers, 57.—Bulletin of the U. S. Geological Survey of the Territories, 58.—Second Geological Survey of Pennsylvania, 1874: Report upon the Reconnaissance of Northwestern Wyoming, including Yellowstone National Park, 59.—Report of Progress of the Mineralogical, Geological and Physical Survey of the State of Georgia for the period from Sept. 1 to Dec. 31, 1874, GEORGE LITTLE: Michigan, being condensed popular sketches of the Topography, Climate and Geology of the State, A. WINCHELL: Analysis of Ægirite from Arkansas, J. LAWRENCE SMITH: Second Appendix to Dana's Mineralogy, EDWARD S. DANA. 60.—Mineralogical Contributions, C. KLEIN: On the presence of Vanadium in Rocks: Pseudomorph after crystals of Labradorite from Verespatak, G. TSCHERMAK, 61.—Fungi; their Nature and Uses, 62.—Æstivation in Asimina, 63.—Sachs's Textbook of Botany: Morphological and Physiological, 64.—Zur Abwehr der schwendener-bornet'schen Flechtentheorie, G. W. KOERBER, 65.—Gustave Thuret: An Inquiry Respecting the Reversion of "Thoroughbred" Domestic Animals, W. H. BREWER. 67.—Seventh Annual Report on the Noxious, Beneficial, and other Insects of the State of Missouri, C. V. RILEY, 69.

Astronomy.—The Transit of Venus, Dec. 8, 1874, 70.—On the Solar Structure, FATHER SECCHI, 71.—Observations on Magnetic Declination made at the Trevandrum and Augustia Observatories, J. A. BROUN, 73.—Determination of weights to be given to observations for determining time with portable transit instruments, C. A. SCHOTT: On the Meteorite of Lancé, K. VON DRASCHE, 74.

Miscellaneous Scientific Intelligence.—On the Height of the St. Louis Directrix, G. C. BROADHEAD: Swedish Arctic Explorations: Norwegian Exploration, 75. British Arctic Expedition: American Association for the Advancement of Science, Milligrade Thermometric Scale: Dr. Horace Wells: Report of the Superintendent of the Coast Survey for the year 1871, 76.—The Life and Growth of Language, W. D. WHITNEY: The Recent Origin of Man, J. C. SOUTHALL: Note sur les Tremblements de Terre en 1871, M. ALEXIS PERREY, 77.—Storms, WM. BLASIUS: Climate and Time in their Geological Relations, JAMES CROLL: English Men of Science, F. GALTON: The Aerial World, G. HARTWIG: French Academy of Sciences, 78.—*Obituary.*—John Edward Gray, 78.—Admiral Sherard Osborn: Samuel Heinrich Schwabe: A. G. Findlay: M. Deshayes: Joseph Winlock: Sir William Logan, 80.

NUMBER LVI.

Page

ART. XIV.—Historical Note on the Observation of the Corona and Red Prominences of the Sun; by EDWARD S. HOLDEN, ... 81

XV.—Walker's Statistical Atlas of the United States, ... 83

XVI.—On the Chondrodite from the Tilly-Foster Iron Mine, Brewster, New York; by EDWARD S. DANA. With plates V, VI and VII, ... 89

XVI*a*.—On an easy method of producing Di- and Trinitrophenetol; by PETER TOWNSEND AUSTEN, ... 104

XVII.—On a fœtal Manatee and Cetacean, with remarks upon the affinities and ancestry of the Sirenia; by BURT G. WILDER. With plate VIII, ... 105

XVIII.—On Tidal Waves and Currents along portions of the Atlantic Coast of the United States; by J. E. HILGARD, 117

XIX.—On some of the Ancient Glaciers of the Sierra Nevada; by JOSEPH LECONTE, ... 126

XX.—Certain Methyl and Benzyl Compounds containing Selenium; by C. LORING JACKSON, ... 139

XXI.—Description of the Nash County Meteorite, which fell in May, 1874; by J. LAWRENCE SMITH, ... 147

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Commercial Quinidine Sulphate, HESSE, 148.—On Chrysezarin, the Dioxyquinone of Chrysene, CLAUS: Production of Albumin from Fibrin, GAUTIER: On the conversion of Brucine into Strychnine, SONNENSCHEIN: Formation of Indol from Egg-albumin, NENCKI, 149.—Collodion Films, M. E. GRIPON: Combustion of Explosive Mixtures, M. NEYRENEUF, 150.—Changes in Light due to the motion of the luminous source or of the Observer, M. MASCART, 151.—New Source of Magnetism, M. DONATO TOMMASI, 152.

Geology and Natural History.—The Geology of New Mexico, COPE, 152.—Fossil Ungulates from New Mexico, COPE: Coal beds in the Subcarboniferous of Pennsylvania, J. P. LESLEY, 153.—On the Devonian Trilobites and Mollusks of Kereré, Province of Pará, Brazil, C. F. HARTT and R. RATHBUN: Practical Guide to the Determination of Minerals by the Blowpipe, C. W. C. FUCHS: Mineralogisches Lexicon für das Königreich Sachsen, von AUGUST FRENZEL: Commelynaceæ et Cystandraceæ Bengalenses, C. B. CLARKE, 154.—The Box-Huckleberry (Gaylussacia brachycera Gray): On the preservation of Anatomical Preparations, 155.

Astronomy.—Diameters of the Planets, 157.—Small Planets recently discovered, 158.—Diameter of the Sun, 159.

Obituary.—Sir William Logan: Joseph Winlock, 159.—Prof. Heinrich d'Arrest, 160.

NUMBER LVII.

Page

ART. XXII.—On the formation of Hail in the Spray of the Yosemite Fall; by WILLIAM H. BREWER, ... 161

XXIII.—Walker's Statistical Atlas of the United States, ... 164

XXIV.—On Southern New England during the melting of the great Glacier; by JAMES D. DANA, ... 168

XXV.—Mechanical Work done by a Muscle before exhaustion, and on the "Law of Fatigue;" by SAMUEL HAUGHTON, 183

XXVI.—Notes upon the Earthquake of December, 1874; by DANIEL S. MARTIN, ... 191

XXVII.—On some interesting Equine Calculi; by R. H. CHITTENDEN, ... 195

XXVIII.—Results of Dredging Expeditions off the New England Coast in 1874; by A. E. VERRILL, ... 196

XXIX.—On the passage of two Bolides in 1872 and 1874, over Middle Kentucky; by J. LAWRENCE SMITH, ... 203

XXX.—Note on the Gases accompanying Meteorites; by J. W. MALLET, ... 206

XXXI.—A New Vertical-lantern Galvanometer; by GEORGE F. BARKER, ... 207

XXXII.—Notice of the occurrence of another Gigantic Cephalopod (Architeuthis) on the coast of Newfoundland, in December, 1874; by A. E. VERRILL, ... 213

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Hypochloric oxide and Euchlorin, PEBAL: Presence of Sulphuric oxide in the Gaseous products of combustion of Pyrite, S. KESTNER, 215.—Calcium Hypochlorite from Bleaching Powder, KINGZETT: Occurrence of Bromoform in Commercial Bromine, REYMANN: Use of Spectrum Analysis in titrition, 216.—Fluorene and fluorene Alcohol, BARBIER, 217.—Pararabin, a new Carbohydrate, REICHARDT: Friction of Rarefied Gases, A. KUNDT and E. WARBURG, 218.—Conductibility of Heat by Gases, KUNDT and WARBURG, 219.—Emissive Power of Leaves, M. MAQUENNE, 220.—Velocity of Magnetization, M. DEPREZ, 221.—The "Challenger's" Crucial Test of the Wind and Gravitation Theories, JAMES CROLL, 222.—Artificial imitation of magnetipolar native platinum, M. DAUBRÉE, 225.—How to teach Chemistry, E. FRANKLAND, 227.

Geology and Natural History.—Cotemporoneous formation, in the thermal waters at Bourbonne-les-Bains, of different Mineral Species M. DAUBRÉE, 228.—Man of the Quaternary, JOHN EVANS, 229.—Protriton petrolei of the Upper Coal-Measures of France, a naked-skinned Salamander, M. A. GAUDRY, 232 —Period of Extinction of the ancient Fauna of the Island of Rodriguez, M. A. MILNE-EDWARDS: Reliquiæ Aquitanicæ, E. LARTET and H. CHRISTY, 233.—Structure of Stone Mountain, Georgia, 234.—Genus Anomalodonta of S. A. Miller: Expansion of rocks by heat: Geology of Eastern Massachusetts: South American Geology: On the composition of Coal, etc., P. SCHWEITZER: Revue de Géologie pour les Années 1871 and 1872: Devonian trachyte of Queensland, Australia: Phosphate of Lime of Bamle, Norway, 235.—Mineralogische Notizen von Frederich Hessenberg: Tables for the Determination and Classification of Minerals found in the U. S., J. C. FOYE: Observations on the Phenomena of Plant life, W. S. CLARK: Forest Flora of N. W. and Central India: Flora Brasiliensis, 237.—Different effects of the same temperature upon the same species of plants under different latitudes, 237.—Dr. JOHN EDWARD GRAY: North American Oniscida, 239.

Miscellaneous Scientific Intelligence.—American Association for the Advancement of Science: Cincinnati Society of Natural History: Preliminary Report upon a Reconnaissance through Southern and Southeastern Nevada: The Mosaic Account of Creation, C. B. WARRING: Mineral Collection of Dr. Krantz, 239.—*Obituary.*—G. P. Deshayes, 240.

NUMBER LVIII.

Page

ART. XXXIII.—Address of Dr. John L. LeConte, the retiring President of the American Association for the Advancement of Science, ... 241

XXXIV.—On the Temperature attainable by Rock-crushing, and its Consequences; by ROBERT MALLET, ... 256

XXXV.—Sir Charles Lyell, ... 269

XXXVI.—On the Arithmetical Relations between the Atomic Weights; by M. D. C. HODGES, ... 277

XXXVII.—On Southern New England during the Melting of the great Glacier; by JAMES D. DANA. No. II, ... 280

XXXVIII.—Corals at the Galapagos Islands; by L. F. POURTALÉS, ... 382

XXXIX.—Comparison between the Ohio and West Virginia sides of the Alleghany Coal-field; by E. B. ANDREWS, .. 283

XL.—Instinct? in Hermit Crabs; by ALEXANDER AGASSIZ, . 290

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—On the Constitution of Ammonium Compounds, MEYER and LECCO: On Retene, EKSTRAND, 292.—On Propargylene, a new hydrocarbon, C_3H_2, PINNER: Synthesis of a dextro-rotatory Malic acid, BREMER, 293.—On Ethyl and Amyl-sulphocarbonates as remedies for the Phylloxera, ZÖLLER and GRETE, 294.—On the occurrence of Ethyl Alcohol in Plants, GUTZEIT: On Arbutin, HLASIWETZ and HABERMANN, 295.—A new Base obtained in the Aniline manufacture, JACKSON: Viscosity of Saline Solutions, M. A. SPRUNG: Photographic Irradiation, Capt. ABNEY, 296.—Conical Refraction, M. NODOT, 297.—Dielectric Capacity of Gases, M. L. BOLTZMANN: The human body rendered luminous by Phosphuretted Hydrogen, GEO. MACLEAN, 298.

Geology and Natural History.—Pseudomorphism and Metamorphism, a correction, JAMES D. DANA, 298.—On *Triarthrus Beckii*, supposed to have been found in a boulder in the Connecticut Valley, W. W. DODGE: Forms and Origin of the Lead and Zinc Deposits of Southwestern Missouri, ADOLF SCHMIDT, 300.—Carboniferous Conifers, J. W. DAWSON, 301.—Fossil Trees of Craigleith Quarry, Scotland: Volcanic History of Ireland, E. J. HULL, 302.—Asphaltic Coal from the shale of the Huron River, Ohio, A. R. LEEDS: Eruption of Tridimitic Ashes, Dr. A. BALTZER: Exploration of the Colorado River of the West, and its Tributaries, by J. W. POWELL, 303.—Report of the Geological Survey of Ohio, Vol. II, Part I, Geology, 304.—Sixth Annual Report of the Geological Survey of Indiana made during the year 1874, 305.—Geological and Natural History Survey of Minnesota, 1874, N. H. WINCHELL, 306.—Note on Lignite in the Cretaceous of Minnesota, N. H. WINCHELL, 307.—Note on the Age of the Cretaceous of Vancouver Island and Oregon, W. M. GABB: Sub-Wealden Exploration: Das Elbthalgebirge in Sachsen, Dr. GEINITZ, 308.—Paleontological Cabinet of Prof. James Hall: On two new varieties of Vermiculites, J. P. COOKE and F. A. GOOCH: Dana's System of Mineralogy: Hematococcus lacustris, &c., 309.—Catalogue of Plants growing without cultivation within thirty miles of Amherst College, E. TUCKERMANN, 310.—Serjania Sapindaceæ Genus monographice descriptum, L. RADLKOFER: Zur Keimungsgeschichte der Charen, A. DE BARY: Description of a new Crustacean from the Water-lime group at Buffalo, A. R. GROTE and W. H. PITT, 311.—Bathybius, 312.

Miscellaneous Scientific Intelligence.—American Association, 313.—Foreign Scientific Associations: The British Scientific Expedition, 315.—Images produced by Lightning, W. L. BROWN, 317.—Annual Report of the Argentine Meteorological Office for 1874: Appletons' American Cyclopedia, 319.—Boston Society of Natural History: Geographical Congress at Paris, 320.—*Obituary.*—I. A. Lapham: Carl Johann August Theodor Scheerer, 320.

NUMBER LIX.

Page

ART. XLI.—On the Variation in the Strength of a Muscle; by FRANCIS E. NIPHER, ... 321

XLII.—Studies on Magnetic Distribution; by H. A. ROWLAND, 325

XLIII.—The Effect of the Glacial Epoch upon the Distribution of Insects in North America; by AUG. R. GROTE, 335

XLIV.—Æstivation and its Terminology; by ASA GRAY, .. 339

XLV.—Abstract of a Memoir on the "Biological Relations of the Jurassic Ammonites;" by A. HYATT, ... 344

XLVI.—Meteoric Iron, Dickson County, Tenn.; by J. L. SMITH, 349

XLVII.—Specific Gravity Balance; by ROSWELL PARISH, .. 352

XLVIII.—On Southern New England during the Melting of the Great Glacier; by JAMES D. DANA. No. III, ... 353

XLIX.—Iowa County Meteor; by N. R. LEONARD, ... 357

L.—On the Post-pliocene fossils of Sankoty Head; by A. E. VERRILL; with a note on the Geology; by S. H. SCUDDER, 364

APPENDIX.—LI.—On the Odontornithes, or Birds with Teeth; by O. C. MARSH, ... 403

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—On Trimethyl-carbinol, FREUND, 375.—On the Preparation of Epichlorhydrin, PREVOST: On Three new Pinacolins, WISCHNEGRADSKY, 376.—Salylic acid identical with Benzoic, KOLBE: On the Reduction-product of Chlordracylic acid, HARTMANN: Use of Salicylic acid in Titrition, WEISKE, 377.—Synthesis of Malonic acid, PINNER: Action of Chlorine on Pyrogallol, STENHOUSE: Constitution of Emodin, LIEBERMANN, 378.—Coloring Matters Phlorein, Hœmatein and Brazilein, BENEDIKT: Arithmetical relations between the Atomic weights, IRA REMSEN, 379.—Compressibility of Carbonic Acid, ANDREWS, 380.—Magnets formed of Iron Filings, JAMIN, 381.—Sounding Flames, DECHARME, 382.

Geology and Natural History.—Glacial action upon the summit of Mt. Washington, C. H. HITCHCOCK, 383.—Report on the vicinity of the 49th Parallel from the Lake of the Woods to the Rocky Mountains; by G. M. DAWSON, 384.—Report of a Reconnaissance of the Black Hills of Dakota in of 1874; by W. LUDLOW, 385.—Discovery of the Horns of an Ox in Ohio: Cretaceous formation of Mexico; by M. BARCENA, 386.—Mountain Making, O. FISHER, 387.—Sedimentary Formations of New South Wales, by W. B. CLARKE, 389.—Geological Survey of Brazil: Geologische Beobachtungen auf Reisen im Kaukasus, von H. ABICH: Old beach on the Isle of Portland, PRESTWICH: Another New York Mastodon: Microscopical Structure of Rocks, by G. H. KINAHAN: Elemente der Petrographie, A. VON LASAULX, 390.—Minerals of Bourbonne-les-Bains: Mineralogische Mittheilungen, v. ZEPHAROVICH: Wiserine is Octahedrite: Chalcophanite, a new mineral, G. E. MOORE, 391.—Statistics of Mines and Mining, by R. W. RAYMOND: The formation of Starch, 392.—A Report on the Trees and Shrubs in the Forests of Massachusetts, by G. B. EMERSON, 393.—On Thallophytes, by W. T. T. DYER, 394.—Monographie der Juncaceen vom Cap, BUCHENAU: Elements of Zoology; by S. TENNEY, 395.—First Book of Zoology, by E. S. MORSE, 396.—The Bones, Ligaments, and Muscles of the Domestic Cat, by H. S. WILLIAMS: Alcyonoid polyps of the Umbellularia group, 397.

Astronomy.—Observations de Poulkova; OTTO STRUVE, 398

Miscellaneous Scientific Intelligence.—Journal of the Scottish Meteorological Society, 398.—Voyages a la Cote Nord-Ouest de l' Amérique, 1870–72, A. L. PINART: Index of Professional and Scientific papers in the Coast Survey Reports, 400.—Meteoric Iron in Missouri; by G. C. BROADHEAD, 401.—On Poisons in relation to Medical Jurisprudence and Medicine; by A. S. TAYLOR: Strength of the Lion and the Tiger, by S. HAUGHTON, 402.—*Obituary.*—W. J. Henwood: S. D. Tillman, 402.

NUMBER LX.

Page

ART. LII.—On Southern New England during the melting of the Great Glacier; by JAMES D. DANA, ... 409

LIII.—Ammonia a constant contaminant of Sulphuric Acid; by F. H. STORER, ... 438

LIV.—Abstract of a Memoir on the Origin of the Alps; by EDWARD SUESS, ... 446

LV.—Studies on Magnetic Distribution; by H. A. ROWLAND, 451

LVI.—Notes on a New Feature in the "Comstock Lode;" by G. P. BECKER, ... 459

LVII.—Notice of New and Interesting Coal Plants; by E. B. ANDREWS, ... 462

LVIII.—Letter to the Editors, from Dr. B. A. GOULD, ... 466

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—An Air Damper for Balances, ARZBERGER: On a Convenient method of Preparing Sulphuryl Chloride, BEHREND: Action of dilute Mineral Acids on Bleaching Powder, KOPFER, 471.—Method for the Quantitative Separation of Ferric Oxide, FLIGHT: On the Gases enclosed in Coals, THOMAS, 472.—On Chrysophanic Acid, LIEBERMANN and FISCHER: On the Quantitative Determination of Vanillin in Vanilla, TIEMANN and HAARMANN, 473.—On the Localization of Arsenic in the Tissues: Cold Bands of Dark Spectra, DESAINS and AGMONET, 474.—Luminosity of Flames, WIBEL, 475.—Rotatory Polarization of Quartz, SORET and SARAZIN, 476.—Researches on the Hexatomic Compounds of Cobalt; by W. GIBBS: Professor Tyndall and Professor Henry on Sound, 477.—A new Treatise on Elements of Mechanics, etc.; by JOHN W. NYSTROM, 479.

Geology and Natural History.—Primordial fossils in pebbles of Newport Conglomerate, W. B. ROGERS: Bowlder near Batavia, Genesee County, New York, 479.—On a method of distinguishing the different Feldspars by means of their optical properties, DESCLOIZEAUX, 480.—Contribuzoni Mineralogiche per servire alla Storia dell' Incendio Vesuviano del Mese di Aprile, 1872, memoria di ARCANGELO SCACCHI: Materialien zur Mineralogie Russlands, von KOKSCHAROW: Memoire sur la Famille des Pomacées, par J. DECAISNE, 481.—Elementary Lessons in Botanical Geography, by J. G. BAKER, 484.

Astronomy.—Observations on the late Transit of Venus at Beechworth, Victoria; by HENRY J. ANDERSON, 484.

Miscellaneous Scientific Intelligence.—The Anderson School, ALEXANDER AGASSIZ, 485.—Annual Report of the Board of Regents of the Smithsonian Institution, 487.—Croll on Climate and Time: A Course in Descriptive Geometry for the use of Colleges and Scientific Schools, by WILLIAM WALTER: American Naturalist: School of Geology in the University of Syracuse. 488.

NUMBER LX*.

Page

ART. LIX.—On the Solar Chromosphere; by S. P. LANGLEY, 489

LX.—On the overflows of the Connecticut during the Glacial flood; by JAMES D. DANA, ... 497

Index, ... 509
